Leanderson Monteiro

Team Manager | Software Architect | Tech Leader | Full Stack Developer | GCP | AWS
Lisboa, Lisboa, Portugal

Resumo

I lead a multidisciplinary team that brings together business strategy, product, and technology to scale initiatives in the real estate sector.I have over 15 years of experience in software development. My path includes roles as full stack developer, tech lead, and software architect, across insurance, energy, and education. I have solid knowledge of PHP, Python, JavaScript, and OutSystems, plus hands-on experience with GCP and AWS.I like to be involved from the very beginning of a project, from planning and architecture to delivery and maintenance, always focused on quality, good practices, and business results. I'm proactive, I take responsibility, and I'm always looking to learn more.

Experiência

Doutor Finanças
1 ano 6 meses

Team Manager
janeiro de 2026 - Present (11 meses)
Lisboa, Portugal

I lead a multidisciplinary team focused on developing and scaling strategic initiatives within the real estate sector.

I am responsible for turning vision into execution, ensuring strong alignment between business strategy, product direction, and technology. I oversee multiple initiatives, from established projects to new ventures in early-stage development, with a focus on sustainable growth, operational efficiency, and value creation.

Key responsibilities:

• Leading and developing a high-performance team
• Defining strategic roadmap and priorities

• Managing stakeholders and executive alignment
• Delivering solutions with direct business impact
• Identifying and structuring new opportunities within the real estate market

I contribute to building a robust, scalable, and data-driven real estate ecosystem, strengthening Doutor Finanças' presence and long-term positioning in this segment.

Tech lead
junho de 2025 - dezembro de 2025 (7 meses)
Lisboa, Portugal

5 Estações
OutSystems IT Consultant
agosto de 2021 - maio de 2025 (3 anos 10 meses)

Fidelidade
OutSystems Architect - CoE (Outsourced by 5 Estações)
agosto de 2021 - maio de 2025 (3 anos 10 meses)
Lisboa, Portugal

My main responsibility is to ensure the development of actions to promote the technological platforms that support the development.

- Define and control the platforms' best practices, through the use of regular audits, training of development teams, and governance mechanisms created for this purpose;
- Define, together with the Enterprise Architecture team, the foundations of digital architecture and core platforms;
- Implement transversal components of the platforms, fulfilling the architectural requirements that enable their use by applications/solutions within the scope of the Fidelidade Group;
- Ensure the evolution of platforms, ensuring the support of the respective suppliers;
- Ensure technical and functional integration with core business solutions;
- Evolve non-functional requirements, such as authentication and authorizations;
- Maintain and evolve the robustness testing tools of the distributed infrastructure, enhancing the rapid detection of anomalous situations, helping to diagnose errors.

- Manage, streamline and guarantee the data archiving of business applications, as well as the implementation and coordination of masking data from non-productive environments;
- Ensure support, preparation and coordination of meetings of committees and management bodies created within the scope of their responsibilities.
- Calculate, create and monitor the platforms' KPIs and suggest changes to ensure compliance with good practices through regular audits;
- Develop and maintain quality requirements and characteristics;
- Ensure the management of the technical parameters of the platforms within its scope of action;
- Maintain environments, according to the rules established together with the development, Enterprise Architecture, Quality Assurance and Infrastructure and Operations teams;
- Maintain and evolve the DevOps process ensuring its evolution and extension to the entire Architecture in full alignment with the Agile methodology, security and performance rules.

EDP

2 anos 6 meses

Technical Lead (Outsourced by Novabase)

março de 2021 - agosto de 2021 (6 meses)

Lisboa, Portugal

Tech leader in some projects with this stack: PHP, RestFul, Angular 7/8, Git Flow, Jenkins, CI/CD, Unit tests, Agile Development, Scrum.

My responsabilities is :
- Ensure the quality of all technical deliverables of its application.
- Apply the principles of software engineering to the design, development, maintenance, testing, and evaluation of software.
- Ensure that the application is designed and implemented taking into account the performance and SLAs required by business.
- Know the technical aspects of the application (Architecture, Infra, ...) as well as the functional and contextual aspects.
- Create the conditions to have the application in a Continuous Integration/ Continuous Delivery (CI/CD) automated mode.
- Identify and maintain a clear backlog of the technical debt in order to help the Product Owner prioritize and decrease the overall product technical debt.
- Lead the technical evolution of the application.

- Ensure that the application and the team follows the Security, Development, Architecture and Business Continuity guidelines and rules, includes security vulnerability resolution.
- Align with the Platform Expert and Solution Master to implement the guidelines and frameworks defined by EDP.
- Ensure that the correct documentation of the application, including all the CI of the application are registered and up-to-date in the CMDB (ServiceNow).
- Manage its application infra-structure cost and consumption.
- Identify the monitoring and alerts needed to manage the application while ensuring the application is monitored via Centro de Comando.
- Continue the development of the system in parallel with the team on some tasks.

Full Stack Developer (Outsourced by Novabase)
